

Flawless engines and impeccable service, Hirth Engines stands for unmatched engineering solutions worldwide with over 90 years in the aviation business, over 1 million engines sold, more than 30 years in UAV engine production and over 60 years in two-stroke engine production.

Become part of a team that impresses with industry-leading know-how, technology and innovation. This powerful combination of tradition, excellence and creativity has placed Hirth at the forefront of a competitive industry and made it the leader in two-stroke engine technology.

To strengthen our team

We are now looking for a:

Technical writer (m/f/d) (employment or freelancer)

Your Tasks:

- Independent creation of complex and detailed technical descriptions, installation, operating, assembly and maintenance instructions for our engines in accordance with applicable aviation standards
- Reading, interpreting and understanding construction documents and parts lists
- Independent research and, if necessary, taking photos
- Adherence to specifications, taking technical requirements into account
- Compliance with binding specifications, official requirements and standards
- Modular structure of the documents
- Creation of graphics from CAD 3D models
- Creation of parts lists and exploded views for the spare parts catalogues

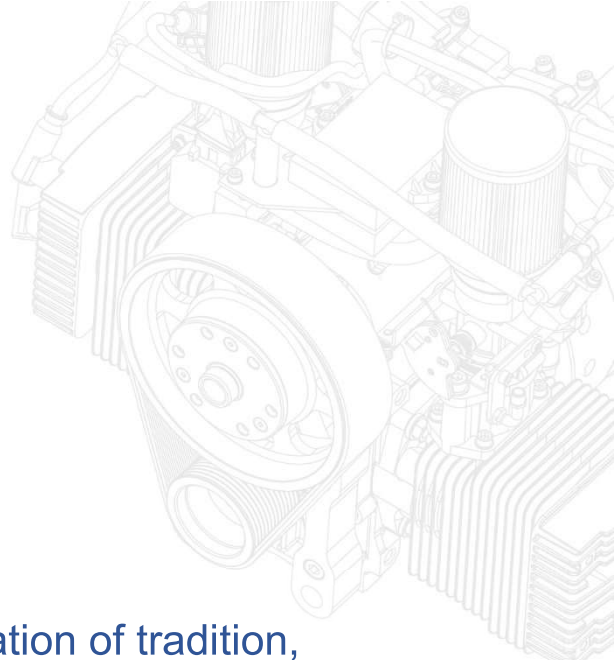

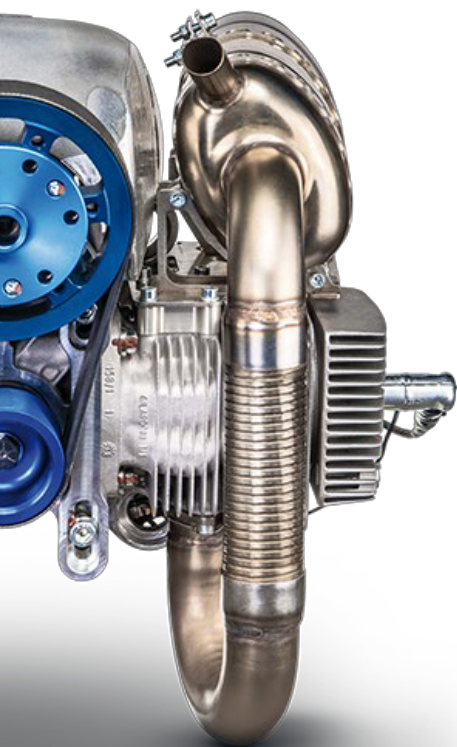

Your Profile:

- Completed training/degree in the field of technical editing or a comparable qualification
- Business fluent German and proficient knowledge of spoken and written English (Simplified English desirable)
- Independent and precise way of working
- Ability to formulate complex technical issues in a clear and understandable way
- Willingness and ability to learn new tools
- Knowledge of EASA specifications/regulations or 2-stroke internal combustion engines desirable
- Knowledge of CAD systems (preferably CATIA V5/V6) desirable

We Offer You:

- Future-proof and modern full-time job in a friendly team with flat hierarchies
- 37 hours per week with flexible working hours including mobile working
- an exciting and varied area of responsibility
- Individual and needs-oriented software training and familiarization with the regulations of the international standards of the aviation industry
- Open management culture and short decision-making paths
- Fast connection to public transport (S-Bahn can be reached in 5 minutes on foot)
- Performance-related remuneration by agreement
